- Built a full-stack music streaming web application with separate frontend and backend architecture.
- Developed a responsive Spotify-inspired UI using React, TypeScript, Tailwind CSS, and Radix UI.
- Implemented music playback features including play/pause, next, previous, volume control, progress tracking, and album-based playback.
- Designed RESTful APIs with Node.js, Express, and MongoDB to manage songs, albums, users, and dashboard statistics.
- Integrated Clerk authentication with protected routes and admin authorization for secure access control.
- Built an admin dashboard allowing authorized users to add/delete songs and albums with media uploads via Cloudinary.
- Managed client-side state using Zustand for music data, authentication status, and audio player behavior.
